

PIONEER
WATER TANKS

ANTIMICROBIAL WATER TANK LINER

Powered by Sanitized® & Exclusive to Pioneer Water Tanks

Only Pioneer can provide the freshest water for you and your family

Water containers treated with Sanitized®
Good protective action against biofilm formation

Untreated water containers
No adequate protective action

Water tank liners are subject to biofilm formation due to algae, bacteria and moulds. Bacterial contamination is not visible to the naked eye and high numbers of bacteria impair hygiene.

With the incorporation of Sanitized® antimicrobial technology, The Pioneer AQUALINER Fresh® water tank liner offers advanced protection from the colonisation and reproduction of algae, bacteria, and moulds. Sanitized® antimicrobials add an additional layer of defense in the fight against microbes.

Patent Pending 2017902908

FREE UPGRADE

Place your order before the end of November and you will receive a free upgrade to the world first, antimicrobial water tank liner powered by Sanitized® and exclusive to Pioneer Water Tanks

Pioneer Water Tanks have teamed with Sanitized® to create the world's first antimicrobial water tank liner. Our AQUALINER Fresh® tank liner actively reduces growth of biofilm and algae. AQUALINER Fresh® keeps your water fresher for longer.
